

## Polyester glove coated in Gray Nitrile

This product combines the elasticity, comfort and tactile sensitivity of the base fabric and nitrile coating, which maintains a good elastic memory, allowing the gloves to remain flexible and offer excellent resistance to abrasion.

The glove offers great safety even in work situations where oils and slippery substances are present.

Nitrile coating prevents the permeation of hydrocarbons, allowing the hands to remain clean.

The hands can breathe freely.  
Elastic cuffs to ensure excellent fit and safety.

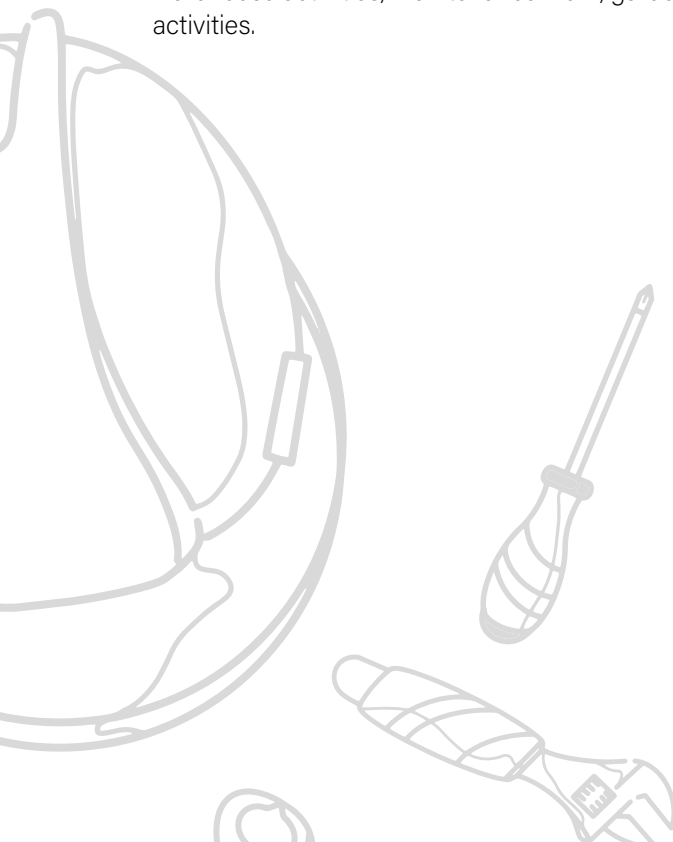

Particularly recommended for use in industrial settings, for warehouse activities, maintenance work, gardening and similar activities.

**COD. NM-SMN**

DPI DI II CAT.

**SUITABLE TO PROTECT FROM MECHANICAL RISKS:**

- ABRASION 4
- CUT 1
- TEAR 2
- PERFORATION 1
- TDM CUT X
