

## CHEMICAL-RESISTANT NITRILE GLOVE

High-quality nitrile reusable glove that offers exceptional protection against chemicals, oils and acid-based solvents. Anatomically shaped for right and left hand, flocked internally for better fit and sweat absorption. To provide added safety and protection, it is highly resistant to abrasion, cut and puncture.

Very high tactile sensitivity and extended protection beyond the wrist. Molded palm and fingers provide excellent grip in both dry and wet conditions.

COD. NF-1513

DPI DI I CAT.
