

Polyester glove coated in Red crinkle Latex

The glove combines the elasticity, comfort and tactile sensitivity of the base fabric with a water-repellent crinkle latex coating, which maintains a good elastic memory, allowing the glove to remain flexible and simultaneously offer good abrasion resistance.

Thanks to the crinkle finish, the glove offers great safety even in work situations where there are oils and slippery substances.

Leave your hand free to breathe.

Elasticated cuff to ensure excellent fit and safety.

The use is particularly recommended in industry, warehouse activities, maintenance work, gardening and similar activities.

COD. NM-RML

DPI DI II CAT.

SUITABLE TO PROTECT FROM MECHANICAL RISKS:

- ABRASION 2
- CUT 1
- TEAR 3
- PERFORATION 2
- TDM CUT X
